	Page
Plenary lecture	
<i>Masayuki Miyanishi</i> Manufacturing of light weight cars	1
<i>Kozo Osakada</i> Application of servo presses to metal forming processes	9
<i>Gerhard Hirt, Stephan Heppner</i> Selected trends for metal forming innovations	17
<i>Zbigniew Pater</i> Development of cross-wedge rolling theory and technology	25
Rolling	
<i>Peter D. Hodgson, Ilana B. Timokhina, Hossein Beladi</i> Nanostructural engineering of steel	33
<i>Sung-Hoon Cha, Jong-Bong Kim, Sa Sung Park, Jong-Ho Kim, Nak-Kyu Lee</i> Design of micro pattern forming process on thin sheet metal for electronic device panels	39
<i>Joerg Brecht, Peter Finge, Andreas Hauger</i> Tailor rolled products – Innovative lightweight design technology for body structures and chassis applications	43
<i>Shigeru Ogawa, Kenji Yamada, Toshiyuki Shiraishi, Takayuki Otsuka, Yutaka Sadano, Hisataka Uto, Kazuto Yamamura, Yoshiaki Shia, Kenji Sorao, Takeo Hoshino, Kunihiko Wakatsuki, Kouichiro Takeshita, Keishiro Ikeda, Kanji Hayashi, Akira Sako, Yutaka Matsuda, Yuji Ikemoto, Hideaki Furumoto</i> Development of intelligent mill and realization of Oita plate leveler	47
<i>Zongan Luo, Guangming Xie, Guodong Wang, Guanglei Wang, Hongguang Wang, Lijun Wang</i> Interface of heavy gauge plate by vacuum cladding rolling	51
<i>Falko Vogler, Alexander Duschka, Peter Groche</i> Part accuracy of hollow profiles manufactured through flexible roll forming.	54
<i>Bogdan Garbarz, Jarosław Marcisz</i> Thermomechanical processing of Al-alloyed structural steel with reduced susceptibility to copper hot brittleness.	58
<i>Dian-yao Gong, Zheng-yi Jiang, Jian-zhong Xu, Xiang-hua Liu, Di Wu</i> Setup models of finishing temperature and rolling speed for hot strip mill.	62
<i>Li Yan-mei, Zheng Dong-sheng, Zhu Fu-xian</i> Effect of finish rolling temperature ranges on microstructure and mechanical properties of hot rolled multiphase steel	66
<i>Krzysztof Muszka, Bradley P. Wynne, Eric J. Palmiere, W. Mark Rainforth</i> Effect of deformation mode on microstructure evolution in Nb-microalloyed steel.	70
<i>Yun Bo Xu, Yong Mei Yu, Bao Liang Xiao, Guo Dong Wang</i> Microstructural modeling and processing optimization during hot strip rolling of high-Nb steels.	74
<i>Fumio Fujita, Takero Watanabe, Hiromasa Shimoyama, Lili Guo</i> Effects of rolling and heat treatment conditions on texture structure and formability of magnesium alloy sheets	78
<i>Alexander Pesin, Victor Salganik, Denis Pustovoytov</i> Modeling of surface crack form change of continuously cast slabs in roughing rolling at wide strip mill 2000	82

<i>Matthias Dünckelmeyer, Christian Kremaszky, Ewald Werner , Gerald Hein , Karl Schörkhuber</i> Analytical modeling of thermo-mechanically induced residual stresses of work rolls during hot rolling	86
<i>Mahan Qwamizadeh, Mahmoud Kadkhodaei, Mahmoud Salimi</i> Analysis of curvature development in asymmetrical plate rolling in free and forced horizontal entry conditions	90
<i>Shinya Kanemori, Hideaki Furumoto, Kanji Hayashi, Takao Owada</i> Reduction of impact force in threading of strip front end and stabilization of mill vibration by mill stabilizer device in hot rolling	94
<i>Yasumitsu Kondo</i> Suppression of surface hot shortness caused by copper in hot-rolling	98
<i>Dongbin Wei, Junxia Huang, Aiwen Zhang, Zhengyi Jiang, Kiet Tieu, Xu Shi, Sihai Jiao, Libin Chen</i> Deformation of oxide scale and roll-strip interface characteristics in hot rolling of stainless steel 304	102
<i>Victor Mendoza</i> FEM analysis of defects and microstructure evolution during hot working of specialty alloys	106
<i>Zicheng Zhang, Fuxian Zhu, Yanmei Li, Zhigang Liu</i> Effect of thermomechanical processing on ferrite grain size and retained austenite morphology of Si-Mn TRIP steel	110
<i>Akio Segawa, Takao Kawanami</i> Visualization of deformation characteristics of oxide scale in hot rolling process by scale transfer method	114
<i>Ui Gu Kang, Shin Woong Jeong, Won Jong Nam</i> Evolution of microstructure and mechanical properties in Al 5052 alloy during warm rolling	118
<i>Marcel Graf, Rudolf Kawalla</i> Simulation system for fast analysis of multistage hot rolling processes strip and rod/wire	122
<i>Masanori Kobayashi, Tomoya Tsuchihashi, Yoshio Morimoto, Takashi Ishikawa</i> Prevention of sheet perforation in universal gap rolling	126
<i>Somrerck Chandra-ambhorn, Thanasak Nilsonthi, Yves Wouters, Alain Galerie</i> Oxidation kinetics, mechanical adhesion and pickling behaviour of thermal oxide scales on hot-rolled conventional and recycled steels	130
<i>Qiang Zhu, Hongtao Zhu, Kiet Tieu, Cheng Lu</i> High temperature oxidation behaviour of a high-speed steel material	134
<i>Xiaoming Zhang, Zhengyi Jiang, Dongbin Wei, Xianghua Liu, Guodong Wang</i> Analysis of casting roll during twin-roll thin strip casting	138
<i>D. Mirahmadi Khaki, A. Akbarzadeh, A. Eftekhari, K. Koroshfar</i> Coiling temperature effect on formability of Nb-microalloyed steel sheet	142
<i>Yongfeng Shen, Wenying Xue, Yanhui Guo</i> Effect of cold rolling and annealing on texture evolution and mechanical properties of if steel sheet	146
<i>Haibo Xie, Zhengyi Jiang, Daniel Yuen</i> Analysis of edge cracks initiation and propagation during cold rolling of thin strip	150

<i>Mahmoud Salimi, Mohammad Mehdi Sahebifard</i> Optimization of strip profile and flatness using hybrid neural-GA algorithm	154
<i>Hiroshi Utsunomiya, Tsuyoshi Yukimoto, Tetsuo Sakai, Shinsuke Suzuki, Hideo Nakajima</i> Pore closure in multi-pass cold rolling of lotus-type porous copper	158
<i>Mohammad Reza Niroomand, Mohammad Reza Forouzan, Mohammad Fasihfar, Mahmoud Salimi</i> Chattering control based algorithm for nonlinear optimization of 5-stands cold strip rolling process parameters	162
<i>Sang Min Byon, Jae Hyeon Lee, Youngseog Lee</i> Experimental and numerical studies of edge cracks of a silicon steel strip in cold rolling	166
<i>Jari Larkiola, Jari Nylander, Martti Verho, Mika Judin</i> Virtual rolling quality system for cold rolling	170
<i>Amir Hosein Sakhaei, Mahmoud Salimi, Mahmoud Kadkhodaei</i> Caliber design in shape rolling by finite element method	174
<i>Fritz Klocke, Björn Feldhaus, Hagen Wegner, Vladimir Bäcker</i> Rolling of defined riblet structures on compressor blades of Ti6Al4V	178
<i>Hiroshi Ona, Ryuhou Sho, Takuo Nagamachi, Kiyomasa Hoshi</i> Development of flexible cold roll forming machine controlled by PLC	182
<i>Keinosuke Iguchi, Kazuki Nishida, Takayuki Hama, Hideyuki Nakamura, Yukihisa Kuriyama, Hirohiko Takuda</i> Finite element analysis of strip deformation in roll forming of electric resistance welded pipe with vertical rolls	186
<i>Radoslaw Patyk</i> Theoretical and experimental basis of regular asperities about triangular outline embossing technology	190
<i>Toshifusa Nakamizo, Ichiro Takasu, Morihiko Nakasaki, Hiroshi Utsunomiya</i> Three-rolls-type hot ring rolling process of large seamless rings	194
<i>Lianggang Guo, He Yang</i> Numerical simulation of inhomogeneous deformation in cold ring rolling	198
<i>Hendrik Schafstall, Christian Barth</i> An innovate approach to automated simulation of full 3D ring rolling process and other incremental forming processes	202
<i>Jarosław Bartnicki, Jarosław Magryta, Zbigniew Pater, Grzegorz Samołyk</i> Rotary compression processes of hollowed parts	206
<i>Abdullatif Al-Salmi, Peter Hartley</i> The influence of roll inclination angle in three-roll rotary rolling of bi-metallic rod	210
<i>MinCheol Lee, SooJin Jang, SeungSang Han, DukJae Yoon, ManSoo Joun</i> New finite-element model of thread rolling.	214
<i>Agnieszka Kulakowska</i> Problems of surface preparation under burnishing rolling in aspect of product quality	218
<i>Wang Baoyu, Zheng Zhenhua, Hu Zhenghuan, Lin Jianguo</i> Methodology on precision cross wedge rolling of camshaft	222
<i>Carolin Binotsch, Andreas Feuerhack, Birgit Awiszus, Heinrich Potthoff</i> FEM simulation of planetary cross rolling process for production of seamless tubes of steel and copper	226

<i>Matthias Schmidtchen, Rudolf Kawalla</i> Multiscale modeling of rolling processes and bond strength development for layered materials	230
<i>Masahiro Saito, Motoo Asakawa, Yoshifuru Sunaga, Masaru Kobayashi, Masahito Kato, Kunio Matsuzaki</i> Manufacturing of Mg/Al clad sheet with pure titanium foil as inserts by hot pressing and rolling	234
<i>Tamer El Nadi, Bernd-Arno Behrens, Richard Krimm</i> Simulation of levelling with adjustable roll bending	238
<i>Motoo Asakawa, Motohiko Urabe, Kotaro Nishimura, Ryota Hamada, Shigeyuki Aizawa, Masahiko Amari</i> Theoretical and experimental analysis of roller leveller straightening for coiled bar	242
<i>Zdzislaw Cyganek</i> Influence of induced strain path on force-energy parameters of rolling process	246
Forging	
<i>SeungSang Han, JaeGun Eom, SoonTae Ahn, SeongMin Jang, YoHun Son, Hyuk Kim, DukJae Yoon, ManSoo Joun</i> Plastic deformation behavior of pre-heat-treated high-strength steel for application in forging	250
<i>Koh-ichi Sugimoto, Junya Kobayashi, Goro Arai</i> Development of ultra high-strength low alloy TRIP-aided steel for hot-forging parts	254
<i>Shiro Torizuka, Eijiro Muramatsu</i> Formability of ultrafine-grained steel : Forming microscrews by cold heading and rolling	258
<i>Sylwia Wiewiórowska</i> Determination of content of retained austenite in steels with TRIP effect deformed at different strain rates	262
<i>Qiushi Li, JaeGun Eom, YeongSu Kim, EungZu Kim, ManSoo Joun</i> Causes of die fracture in automatic multistage cold-forging of high-strength ball-studs	266
<i>Yuji Kume, Makoto Kobash, Naoyuki Kanetake</i> Refinement of grains and second phases in aluminum alloys by compressive torsion processing	270
<i>Jabłońska Magdalena, Bednarczyk Iwona, Bernstock-Kopaczyńska Ewelina</i> Microstructural analysis of alloys from Fe-Al system by means of electron back scatter diffraction	274
<i>XiaoWu, Jian-Jun Li, Zhi-Zhen Zheng, Hua-Min Zhou</i> Formability of Zr-based bulk metallic glass under different loading modes	278
<i>Zhichao Sun, He Yang, Xiaofeng Guo</i> Modelling of microstructure evolution in AISI 5140 steel triple valve forming under multi-way loading	282
<i>Joseph Sehinde Ajiboye, Ki- Ho Jung and Yong- Taek Im</i> Selection of cold forging lubricants by tip test	286
<i>Marcus Bistron, Bernd-Arno Behrens, Hanno Paschke</i> Reduction of wear by boron based multilayer coatings on forging dies	290
<i>Soo-Young Kim, Satoshi Kubota, Masahito Yamanaka</i> Tool life evaluation of cold forging dies using numerical prediction model based on fatigue characteristics of tungsten carbide	294
<i>Jong-Taek Yeom, Jee-Hoon Kim, Jeoung-Han Kim, Jae-Keun Hong, Jae-Sik Lee</i> Hot forging design of cam for vessel engine using finite element analysis and ductile fracture criteria	298
<i>Grzegorz Samolyk, Jarosław Bartnicki, Andrzej Gontarz</i> Fracture model for FEM modelling of cold metal forging	302

<i>Elena Lyamina, Sergei Alexandrov, Dragisa Vilotic, Dejan Movrin</i> Effect of shape of samples on ductile fracture initiation in upsetting	306
<i>Jung Min Seo, Jeong Hoon Noh, Beong Bok Hwang</i> Sensitivity of dimensional changes to ring geometry using FE simulation	310
<i>Seong-Hoon Kang, Sang-Woo Kim, Young-Seon Lee</i> Application of modified hydrostatic stress model to internal void crushing in forging of large-scale ingot	314
<i>Thomas Kroiss, Ulf Engel, Marion Merklein</i> Simulation-based determination of deflection characteristic of tooling system and its modeling in FE simulation of cold forging process	318
<i>Takashi Ishikawa, Yoshinori Yoshida, Nobuki Yukawa, Michiaki Kamiyama, Hirotaka Ogitani, Tomoaki Suganuma</i> Cold forge bonding of steel and aluminum alloy	322
<i>Huachang Wang, Hongfu Wang, Yuxi Tang</i> Variation in temperature distribution of die from unsteady to steady states in hot-forging of car front-wheel-hub	326
<i>Cheng Xiu-quan, Huo Yu-lin, Xia Qin-xiang, Kuang Bei-gu, Cheng Wen-xuan</i> Closing of central cavity in shaft heavy forging	330
<i>Tung-Sheng. Yang, Sheng-Yi. Chang, Zong-Xian. Jiang</i> Predictions of maximum forging load and initial billet's dimensions of near net-shape of near net-shape bevel gear forging	334
<i>Satoru Kuwaharada, Kenji Nakanishi, Takehiko Matsuda, Yasumichi Matsumoto</i> Net shape forging of light weight LED light housing developed by physical forming simulation	338
<i>Wei-Shin Lin, Chun- Feng Tseng</i> Effect of hot forging deformation rate to carburizing treatment for hot forging parts	342
<i>Hanns Kache, Rouven Nickel, Bernd-Arno Behrens</i> Development of variable warm forging process chain	346
<i>Bernd-Arno Behrens, Dirk Odening</i> Material influence on shrinkage behaviour of precision-forged parts	350
<i>Tomoyoshi Maeno, Hiroyuki Fujii, Ken-ichiro Mori, Masahiro Sato</i> Control of slide motion in hot impression die forging of aluminium alloy billets using servo press	354
<i>Gontarz Andrzej, Pater Zbigniew, Samolyk Grzegorz, Tofil Arkadiusz</i> Forging of connecting rod without flash	358
<i>Emi Onodera, Yunping Li, Tadayoshi Odahara, Hiroaki Matsumoto, Akihiko Chiba</i> Intelligent hot forging process of artificial hip joint made of Ni-free Co-29Cr-6Mo-0.12N alloy	362
<i>Zhang Bao-hong, Zhang Zhi-min</i> Theoretical analysis and experimental verification of tooth parameters of die cavity for cold sizing process of spur gear	366
<i>Yunping Li, Emi Onodera, Tadayoshi Odahara, Hiroaki Matsumoto, Akihiko Chiba</i> Friction correction of deformation curves in hot forging process of cylindrical sample	370
<i>Fanjuan Meng, Carl Labergere, Pascal Lafon</i> Parameters optimization of metal forming process	374
<i>Takahiro Ohashi, Yusuke Tsurumi, Yasushi Murata, Heihachi Ueki, Soju Matsumoto, Kenji Iwata</i> VR system for aiding preform design of hot forgings using haptic device	378

<i>Mohammad Kazem Kouroshfar, Daavood Mirahmadi Khaki</i> Investigation of effects of thermomechanical processing parameters on restoration behavior in X210Cr12 steel	382
<i>K Zhu Chun-dong, Cheng Meng-biao</i> Optimization of tie-bar end forming process	386
Extrusion and drawing	
<i>Byung-Min Kim, Seon-Bong Lee, Sang-Kon Lee</i> Curved profile extrusion process for Al6xxx automotive suspension arm	390
<i>Beong Bok Hwang, Jeong Hoon Noh, Ho Yong Lee</i> Forming load characteristics in combined extrusion process	394
<i>Vishara Ruchiranga Jayasekara, Jeong Hoon Noh, Beong Bok Hwang</i> Material flow characteristics of combined tube extrusion process	398
<i>Mario Epler, Wojciech Misiolek</i> Combined physical and numerical simulation of bimetallic tube extrusion	402
<i>Takeshi Yoneyama, Masaya Takahashi</i> Effect of ultrasonic vibration on metal compression and extrusion.	406
<i>Takahiro Ishiguro, Masayuki Yoshimura, Yoshinori Yoshida, Nobuki Yukawa, Takashi Ishikawa</i> Influence of slide motion on dimensional accuracy in cold backward extrusion by using servo press.	410
<i>Kenji Hirota, Kumiko Maeda, Akira Shirai</i> Forming of stepped shaft by sheet extrusion	414
<i>Dyi-Cheng Chen, Ming-Wei Guo, Chih-Hsuan Jao, Ci-Syong You</i> Use of Taguchi method to study deformation mechanisms during indirect extrusion of seamless tube	418
<i>Farhad Parvizian, Tobias Kayser, Bob Svendsen</i> Modelling and simulation of dynamic microstructure evolution of aluminium alloys during hot forming processes	422
<i>Isaac Flitta, Terry Sheppard</i> Prediction of substructure influencing static recrystallisation using FEM analysis	426
<i>Marita Karimi, Faramarz Fereshteh-Saniee, Naeemeh Fakhar</i> Experimental and numerical parameter studies on plane-strain backward extrusion	430
<i>Jung Min Lee, Jung Hwan Lee, Dae Cheol Ko, Dong Hwan Kim, Byung Min Kim</i> Application of powder pad and die design with ribbon-shaped chamber for direct extrusion of multi-cell tube using porthole die	434
<i>Jianmin Yu, Zhimin Zhang, Lihui Lang, Baohong Zhang</i> Influence of plastic deformation on mechanical properties and microstructure of annealed ZL102 alloy	438
<i>Ya Cui, Zhimin Zhang, Baohong Zhang, Jianmin Yu, Qiang Wang</i> Effect of multiple plastic deformation on microstructure and mechanical properties of 7A04 ultra-high strength aluminum alloy	442
<i>Ping-Hsun Tsai, Wan-Chi Chang, Guogi Li, Jaebong Yang, Jin Yong Oh, Michael Foster, Wei-Tsu Wu</i> 3-D FEM simulation of aluminum extrusion.	446
<i>Jeong-Hoon Noh, Beong Bok Hwang</i> Surface stress profiles and forming limit in radial extrusion	450
<i>Kai Kittner, Carolin Binotsch, Birgit Awiszus</i> Models for determination of interface strength and quality of aluminum-magnesium compounds	454

<i>Pawel Kazanowski</i>	
Evaluation of fracture surface features in support of extrusion tools design optimization	458
<i>Akira Yanagida, Keisuke Ishikawa, Kensaku Okazaki, Akira Azushima</i>	
Effect of Ti addition on tensile properties of C-Mn steels subjected to ECAP and heat treatment.	462
<i>Yan Zhao, Hongzhen Guo, Yongqiang Zhang, Zekun Yao, Zhifeng Shi</i>	
Influence of ECAP processing parameters on microstructure of TA15 titanium alloy	466
<i>Andrzej Rosochowski, Malgorzata Rosochowska, Lech Olejnik, Bert Verlinden</i>	
Incremental equal channel angular pressing of sheets.	470
<i>Zbigniew Gronostajski, Maciej Zwierzchowski, Marek Hawryluk, Tomasz Skubiszewski</i>	
Aluminum bronze BA1032 deformed by ECAP	474
<i>Mehmet Okan Görtan, Enrico Bruder, Peter Groche, Clemens Müller</i>	
New severe plastic deformation process to produce ultrafine grained materials.	478
<i>Shinsuke Suzuki, Juan Lobos Martin, Hiroshi Utsunomiya, Hideo Nakajima</i>	
Effect of pass route and pass number of equal-channel angular extrusion on structure and strength of lotus-type porous copper.	482
<i>Kazunari Yoshida, Shunichi Kikuchi</i>	
Alternate drawing of aluminum wires for wiring harness.	486
<i>Michał Wielgus, Janusz Majta, Janusz Luksza, Paweł Paćko</i>	
Effect of strain path on mechanical properties of wire drawing products.	490
<i>Sonomi Shirasaki, Motoo Asakawa, Ryosuke Komami, Yuichi Tanaka</i>	
Theoretical analysis of high dimensional accuracy in cold wire drawing.	494
<i>Dae Woon Kim, Sang Kon Lee, Byung Min Kim, Jin Young Jung, Deok Young Ban</i>	
Prediction model of axial residual stress in multi-pass high carbon steel wire drawing.	498
<i>Tsuyoshi Furushima, Yuta Noda, Ken-ichi Manabe</i>	
Effective heating conditions for high speed dieless tube drawing process	502
<i>Janusz Luksza, Katarzyna Szajding, Maciej Rumiński</i>	
Drawing process with ultrasonic activation of sectional drawing die perpendicularly to axis of wire subject to deformation	506
Tube forming	
<i>Jean-Loup Chenot, Elisabeth Massoni, Patrice Lasne</i>	
Finite element simulation and optimization of the hydroforming process	510
<i>Majid Elyasi, Pouya Zoghipour, Mohammad Bakhshi-Jooybari, Abdolhamid Gorji, Seyed Jamal Hosseinipour, Salman Nourouzi</i>	
A new hydroforming die design for improvement of die corner filling of conical stepped tubes	516
<i>Cong Han, Yongchao Xu, Shijian Yuan, Yong Wang, Shuai Yang</i>	
Effect of feeding pressure on hydroforming of crank-shaped tubes with ultra-small bending radius.	520
<i>Mehran Kadkhodayan, Ahmad Erfani Moghadam, Mehdi Heidari</i>	
Loading path optimization of T-shape tube hydroforming process	524
<i>Atsushi Shirayori, Michiharu Narazaki</i>	
Hydraulic bulge forming of small diameter tubes	528
<i>Shi-Hong Zhang, An-Ying Yuan, Yong Xu, Ming Cheng</i>	
Influence of new hydroforming loading on formability in auto parts manufacturing	532
<i>Gang Liu, Junyang Peng, Guannan Chu, Shiqiang Zhu, Haitao Xiao, Shijian Yuan</i>	
Deformation patterns in hydroforming of thin-walled Y-shaped tube	536

<i>Shen-Yung Lin, Jhih-Cheng Shih</i> Hydro-formability investigation of bellows with more convolutions	540
<i>Ghader Faraji, Karen Abrinia</i> Analytical investigation of metal bellows forming process	544
<i>Shijian Yuan, Xin Liu, Yongchao Xu, Xiaosong Wang, Jun Qi, Xiaojun Sun</i> Warm hydroforming of aluminum alloy part by axially different heating zones	548
<i>Vadillo Leire, Pérez Iñaki, Hori Izuru, Zarazua Jose Ignacio, Mangas Ángela, San José Juan, Paar Uwe</i> Gas forming of boron steel tubes at low pressure - Applasting	552
<i>Rainer Steinheimer, Carsten Müller-Bollenhagen, Xuelan Schröder, Martina Zimmermann, Bernd Engel, Hans-Jürgen Christ</i> Closed-loop control of deformation induced martensite in complex tube forming process for optimized fatigue properties	556
<i>Hasan Khanlari, Majid Elyasi, Mohammad Bakhshi-Jooybari, Abdolhamid Gorji, Behnam Davoodi, Ghorban Mohammad Alinegad</i> Investigation of pressure path effect on thickness distribution of product in hydroforming process of SS316L seamless tubes	560
<i>Se-Ho Kim, Kee-Poong Kim</i> Simulation-based process development of tube press forming for coupled torsion beam axle of rear suspension assembly	564
<i>Zicheng Zhang, Ken-ichi Manabe, Fuxian Zhu, Mingya Zhang</i> Determination of circumferential mechanical properties of TRIP steel tube by ring tensile test	568
<i>Dong-Hak Kim, Man-Bin Moon, Hyo-Sub Kim, Dong-Choon Hur, Jea-WooYang</i> Development of 4-way pipe stress reduction machine for improved submerged arc welding pipe dimensional accuracy and reduced residual stress	572
<i>Heng-Sheng Lin, Chia-Jung Lin, Yuan-Chuan Hsu, Jiing-Herng Lee, Bean-Yin Lee, Yu-Chiang Chen</i> Feasibility of sinking with rotary swaging for high pressure gas cylinders	576
<i>Kazuhito Takahashi, Takashi Kuboki, Makoto Murata, Kouzo Yano</i> Influence of initial thickness of circular tube in rotary-draw bending adding axial pushing force for suppression of flatness	580
<i>Takashi Kuboki, He Huang, Makoto Murata, Yohei Yamaguchi, Kouichi Kuroda</i> FEM analysis of tube straightener adopting implicit scheme	584
Sheet metal forming	
<i>Beom-Soo Kang, Seong-Chan Heo, Ja-Kyung Ku, Jung-Won Park, Tae-Wan Ku</i> Multi-stage deep drawing process for rectangular cup with extreme aspect ratio using 3003-H16 aluminum alloy	588
<i>Hu Wang, Guangyao Li</i> Reduction of wrinkling and crack of sheet forming based on least square support vector regression and cross validation sampling approach	592
<i>Woo-Jin Song, Seong-Chan Heo, Young-Seop Byun, Tae-Wan Ku, Beom-Soo Kang, Jeong Kim</i> Prediction of forming limits considering temperature and strain rate effects for magnesium alloy sheet based on local and diffuse plastic instability conditions	596
<i>Mahmoud Abbasi, Mostafa Ketabchi, Hamid Reza Shakeri, Mohammad Hossein Hasannia</i> Investigation into formability of tailor welded blank consisted of IF steel sheets with different thicknesses- Experiment and simulation	600

<i>Jui-Chang Lin, Yu-Chun Chen, Shih-Fong Chiou</i> Optimization of double-square-slot deep drawing process	604
<i>Pongpan Kaewtatip, Varunee Premanond, Anak Khantachawana, Nattapong Boonthongchan, Ratchanee Hato, Nobuhiro Koga</i> Surface quality improvement of ironed aluminum cups by using surface-modified tools	608
<i>Claus-Peter Eckold, Bernd-Arno Behrens, Sven Hübner, Fabian Lange, Peter Groche, Metin Ertugrul</i> Development of blank holder with hydro-elastic segments for deep drawing	612
<i>Sinan Serdar Ozkan</i> Neuro-fuzzy control of blank holder force to improve formability in deep drawing process.	616
<i>Takayuki Muranaka, Masato Okada, Kazuhiko Tanaka</i> Stretch-draw forming of cylindrical cups for improvement of shape accuracy.	620
<i>Zhibing Zhang, Yuqi Liu, Ting Du</i> Fast flanging defects predict and process optimization in sheet metal forming	624
<i>Abdolh-Hamid Gorji, Hassan Alavi-Hashemi, Mohamad Bakhshi-Jooybari, Ghorban Mohammad-Alinejad, Salman Nourouzi</i> Development of hydrodynamic deep drawing assisted by radial pressure for conical-cylindrical parts.	628
<i>Xu Yong-chao, Han Cong, Liu Xin, Yuan Shi-jian, Kang Da-chang</i> Effects of radial pressure on 5A06 aluminum alloy cup hydroforming	632
<i>Jang-Ping Wang, Guo-Ming Huang, Hsien-Der Lee, Tsung-Han Wu</i> Integrated optimal design method for drawing limit of stainless steel in hydro-mechanical deep drawing	636
<i>Hasan Ali Hatipoğlu, Naki Polat, Arif Köksal</i> A methodology to determine friction coefficient in fluidcell forming process	640
<i>Rong Min, Yongjun Wang, Ximing Gou, Junbiao Wang</i> Ageing regulating process for 2024 aluminum alloy thin workpiece formed using rubber fluid forming	643
<i>Morteza Hosseinzadeh, Mohammad Bakhshi-Jooybari, Mohsen Shakeri, Hamid Mostajeran, Hamid Gorji</i> Application of Taguchi method in optimization of new hydroforming die design	647
<i>Asghar Shamsi-Sarband, Seyed Jamal Hosseinipour, Mohammad Bakhshi-Jooybari</i> Theoretical and FEM investigation of superplastic blow forming in conical die	651
<i>Bao-sheng Liu, Li-hui Lang, Sergey Alexandrov, Hu Zhang, Elena Lyamina</i> Experiment determination of two unified fracture criteria for hot sheet hydroforming	655
<i>Mohamed Mohamed, Alistair Foster, Liliang Wang, Jianguo Lin, Daniel Balint, Trevor Dean</i> Formability for hot stamping of Al-alloy panel parts	659
<i>Kanji Ueno, Ken-ichiro Mori, Seiji Maki, Naotaka Arisawa</i> Resistance heating of side wall of cup for warm and hot spline forming	663
<i>Farhad Haji Aboutalebi</i> Numerical and experimental determination of forming limit diagram for DIN 1623 St14 steel	667
<i>Yoshinori Yoshida, Takahiro Ishiguro, Nobuki Yukawa, Takashi Ishikawa, Zhigang Wang</i> Influences of sheared surface properties and induced strain on hole expansion limit of steel sheet	670

<i>Naoto Hagino, Junichi Endou, Shunji Katoh, Seiji Okudera, Masao Maruyama, Makoto Kubota, Chikara Murata</i> In-process monitoring for press forming	674
<i>Wei Wang, Gang Zhao, Fazhong Shi</i> Die surface design CAD software oriented for sheet metal stamping FEM	678
<i>Takashi Nakano</i> Press machine trends and servo press forming examples	682
<i>Yoshikiyo Tamai, Yuji Yamasaki, Akihide Yoshitake, Takaaki Imura</i> Improvement of formability in stamping of steel sheets by motion control of servo press.	686
<i>Kiyoshi Hasegawa, Atsumori Inada, Naoya Kawachi, Jun-ichi Endou</i> Effect of parallel control of press with eccentric load	690
<i>Wen-Hsiang Hsieh, Chia-Heng Tsai</i> A novel mechanical press of stephenson type	694
<i>Tsuyoshi Yokosawa, Seiji Kataoka, Takashi Sato, Kenji Tamaoki, Kengo Fujimaki, Tadao Kato</i> Dry press forming using CVD diamond film coated tool polished by non abrasive ultrasonic vibration polishing	698
<i>Kunio Hayakawa, Kazumi Saito, Tamotsu Nakamura, Shigekazu Tanaka</i> Detection of tribological condition during sheet metal forming using fractal property of acoustic emission	702
<i>Hyun-Min Lee, Young-Ho Seo, Jae-Nam Kim, Woo-Jin Song, Tae-Wan Ku, Beom-Soo Kang, Jeong Kim</i> Development of electromagnetic forming apparatus and experimental application to sheet metal forming processes	706
<i>Marek Burdek, Marcin Miczka</i> Influence analysis of 3D roughness parameters on physical and technological properties of steel sheets.	710
<i>Michael P. Pereira, Paul C. Okonkwo, Wenyi Yan, Bernard F. Rolfe</i> Deformation and frictional heating in relation to wear in sheet metal stamping.	713
<i>Dongsheng Li, Liang Wang, Hongyu Luo, Yanwen Lin, Lianfeng Chen</i> Development on dent resistance testing system for auto-body panel parts	717
<i>Heng Jian Xu, Yu Qi Liu, Zhi Bing Zhang, Ting Du</i> Solid-shell finite element method for progressive die forming simulation	721
<i>Reimund Neugebauer, Welf-Guntram Drossel, Lutz Lachmann, Sebastian Hensel, Matthias Nestler</i> Experimental and numerical study on efficient forming operations of sheet-metal-compounds with integrated piezo-modules	725
<i>Zbigniew Zimniak</i> Influence of high density electric currents pulses on plastic deformation.	729
<i>Jung Min Lee, Jung Hwan Lee, Dong Hwan Kim, Byung Min Kim</i> Effect of galvannealing temperatures on frictional characteristic of GA coating in flat-friction test	733
<i>Ali Alavi Nia, Reza Emami</i> Explosive forming of steel cone using ALE method	737
<i>Chul Kim, Beom-Cheol Hwang, Won-Byong Bae</i> Torsional characteristic and manufacturing process for sleeve spring of torsional vibration damper.	741

<i>Weijun Yang, Dongsheng Li, Xiaoqiang Li, Dehua He</i> A springback compensation method for complex-shaped flange components in fluid-cell forming process	745
<i>Juan Liao, Chi Zhou, Feng Ruan, Yin Zhu</i> Springback reduction of blade part using measuring based compensation methodology	749
<i>Takayuki Hama, Eiji Isogai, Tohru Yoshida, Hirohiko Takuda</i> Experimental verification of springback simulation using local interpolation for tool surfaces	753
<i>Kazunari Imai, Jin Yingjun, Hiroki Tsuruta, Junichi Koyama, Takashi Kuboki, Makoto Murata</i> Computational method of springback in V-bending of sheet having bausing effect	757
<i>Lei Liu, Yongjun Wang, Rui Liu, Qizheng Kang, Zhixue Qiu</i> Springback analysis of stretch-bending forming of complex section profile	761
<i>Yingjun Jin, Takahiro Shibata, Hitoshi Omata, Junichi Koyama</i> Analysis of longitudinal cambering in V-bending of sheet metal	765
<i>Sutasn Thipprakmas</i> Effect of ratio of punch height to workpiece length in partial V-bending process	769
<i>Atsushi Ogata, Yingjun Jin, Takahiro Shibata, Yasushi Yamaya, Junichi Koyama</i> Effect of die shoulder radius on material surface scratch in V-bending of sheet.	773
<i>Jung-Won Park, Ji-Woo Park, Hak-Gon Noh, Beom-Soo Kang, Tae- Wan Ku</i> Press-braking bending process of thick plates	777
<i>Domingo Morales, Carpóforo Vallengano, Andrés J. Martínez-Donaire, Francisco J. García-Lomas</i> Prediction of forming limit strains in metal sheets under stretch-bending conditions	781
<i>Andrés J. Martínez-Donaire, Carpóforo Vallengano, Domingo Morales, Francisco J. García-Lomas</i> Experimental detection of necking in stretch-bending conditions: A critical review and new methodology	785
<i>Matthias Weiss, Chunhui Yang, Bernard Rolfe</i> Effect of skin passing on bending and tension: An experimental investigation	789
<i>Kuang-Jau Fann, Ming-Hsiung Chen, Yu-Sheng Tu</i> Bending of bi-metal sheets in plane strain.	793
<i>Wanjin Chung, Sungjin Lim, Jongho Kim, Daeyong Seong, Dongyol Yang</i> Forming analysis of L-bending of sandwich sheet with pyramid core	797
High strength steel sheet forming	
<i>Mehmet Ali Guler, Firat Ozer, Mustafa Yenice, Mesut Kaya</i> Springback prediction of DP600 steels for various material models.	801
<i>Sung Il Kim, Sang Heum Cho, Youngseog Lee</i> Influence of microstructure on springback of cold-rolled TRIP steel sheet.	805
<i>Jérôme Chottin, Eric Hug, Mohamed Rachik</i> Influence of stress state on mechanical properties of dual phase steel sheets. Experimental and finite element analysis approach.	809
<i>Ke Chen, Jianping Lin, Liying Wang</i> Influence of mechanical properties of AHSS on springback in sheet forming	813
<i>Monika Hycza-Michalska</i> Drawability of advanced high strength steel and creep-resisting nickel superalloys	817
<i>Masato Takamura, Ayako Fukui, Takayuki Hama, Yuji Miyoshi, Masashi Sakata, Hideyuki Sunaga, Akitake Makinouchi, Motoo Asakawa</i> Twisting in curved hat channel products made of high strength steel sheet	821
